There are few grammar books for Sumerian. Unfortunately, Marie-Louise Thomsen's "*The Sumerian Language*" does not use cuneiform, so I cannot recommend it. The same can be said about "*An Introduction to the Grammar of Sumerian*," by Gábor Zólyomi. This leaves us with John Hayes's manual. Therefore, I advise you to buy "A Manual of Sumerian: Grammar and Texts" to learn this ancient language in depth.

# Sentence structure

- 1- [NANNA
- 2- LUGAL.ANI].{(R) #benefactive} -- For his king Nanna,
- 3- [UR.NAMMU
- 4- LUGAL.URIM5.{AK #genitive}].{E #ergative} -- the king of UR
- 5- [E2.ANI].{#object} -- his temple
- 6- MU.NA.DU3 #verb -- he built
- 7- [[BAD3.URIM5].{A(K) #genitive}].{#object} -- the city wall of Ur
- 8- MU.NA.DU3 #verb -- he built

- 1,2- The benefactive has an unwritten R, which is represented by {(R)}
- 3,4- The genitive ends in {AK} after consonant; the ergative ends in {E}
- 5- The object of the action has no ending, which is represented by {}
- 7- The genitive has an unwritten K, which is represented by {A(K)}

Braces represent endings. In the representation of an ending, I may add a hash-prefixed comment on the grammatical function. For instance, the ergative ending {E} may be written as {E #ergative}. The empty ending of the object is commented as {#object}. Unwritten endings are placed between parentheses, such as {(R)}.

## First Line

The Ur-Nammu 9 document is divided into eight lines. On the first line the text  is written, which is the Sumerogram for the name of Nanna, the god of the Moon. The  symbol is read as DIĜIR and is determinative for deity. We will learn in the next paragraph that this word is in the dative case; therefore, the translation of the line is "**For Nanna.**"

## Second Line

The second line contains three Sumerogram22s:  (LUGAL),  (syllable A), and  (syllable NI). LUGAL () means "King" or "Lord." ANI () can be translated as "his." Then LUGAL ANI () means "his Lord." The Sumerogram  (LUGAL) is formed from  (lu<sub>2</sub>, "person") and  (gal, "big").

In Sumerian, like in Latin and German, a nominal phrase has a case marker that indicates various grammatical functions. On the first and second lines, the case marker is the dative, which suggests the beneficiary of the action (*cui bono*). The dative marker is an "R," rarely expressed in writing. Therefore, the whole nominal phrase can be transliterated as [NANNA LUGAL.ANI]-(R), where the (R) is not expressed.

### Third Line

The third line contains the name of Ur-Nammu (𒌦𒍪𒍪), the king who rebuilt the temple of Nanna and is the document's author. The king's name is formed by 𒌦 (UR), which means man or dog, and 𒍪𒍪 (NAMMA), the Mother Earth of the Sumerians. Therefore, the king's name, 𒌦𒍪𒍪, means "The Man of Namma." Note that the determinative of deity (𒍪) precedes the goddess's name.

### Fourth Line

---

On the fourth line, 𒃶𒍪𒍪𒍪 (URIM2) is written, representing the city that was the cult center of Nanna. It is formed by the Sumerograms ŠEŠ (𒃶𒍪) and UNUG (𒍪𒍪). The Sumerogram 𒍪 is determinative for geographic names.

The genitive case denotes possession. Unlike the dative, English has a genitive case, formed by an apostrophe followed by "s." In English, one would say, "Urim's King." In Sumerian, the genitive follows the possessor and is marked with "AK" after consonants and "K" after vowels. In this case, the "A" of "AK" was assimilated with the previous consonant, becoming 𒍪𒌦 (MA). The Sumerogram 𒍪𒌦 (KE4) represents the "K" of the genitive and the "E4" of the ergative.

Sumerian is an ergative language, meaning the agent of transitive actions is marked. In Sumerian, the marker is "E." However, the subject of an intransitive verb, like "to go" or "to sleep," does not receive the "E" that marks the agent.

### Fifth Line

---

The fifth line introduces the temple (E2 - 𒂍) that Ur-Nammu built. The expression 𒂍𒍪𒍪𒍪 (E2 ANI) means "his temple."

### Sixth Line

---

The verb 𒍪𒍪𒍪𒍪 (MUNADU3) can be translated as "built." The verb has three components:

1. 𒍪𒍪 — conjugation prefix
2. 𒍪 — Dimensional Prefix (DP) cross-referencing the dative
3. 𒍪 — verbal root

## Seventh Line

---

The noun phrase 𒂗𒍪𒍪𒍪𒍪𒍪𒍪 (BAD2.URIM2.MA) means "wall of URIM2." The sumerogram 𒂗 (BAD2) means "city wall." The /K/ of the genitive is omissible, meaning it is not expressed because it is not pronounced at the end of a nominal phrase.

## Eigth Line

---

The last rectangle repeats the 𒍪𒍪𒍪𒍪 (MUNADU3) verb.

## Sentence structure

- 1- [INANNA – For Inanna,
- 2- NIN.ANI].{(R) #benefactive} – his Lady,
- 3- [UR.NAMMU – Ur-Nammu,
- 4- [NITA.KALAG].{A #adjective from verb} -- the mighty man,
- 5- [LUGAL.URIM<sup>ki</sup>].{MA(K) #genitive} – the king of Ur,
- 6- [LUGAL.KIENGI.KIURI].{K}. {E} – the king of Sumer and Akkad,
- 7- [E2.ANI].{} -- her temple (of Innana)
- 8- MU.NA.DU3 #verb – (the king) built

Let us interpret the above structure.

- 1-2 (cn an inanna nin a ni) ;; As in text one, this noun phrase ends in an unwritten R, the dative marker.
- 3-4 (cn ur-nammu nita kalag ga) ;; One may form adjectives by adding a nominalizing A-particle to a verbal root, **\*\*kalag\*\*** in the present expression. The nominalizing particle was contaminated by the final G consonant of the preceding word, giving extra information about its correct reading. Different from English, Sumerian adjectives follow the noun they modify.
- 5 (cn lugal urim ma) ;; As we learned from text 1, the genitive is formed by K after vowels and AK after consonants. The scribe often omitted the K of AK. The M of MA is contamination from the final consonant of the previous word.
- 6 (cn lugal ki-en-gi ki uri ke4) ;; In ke4 (𒂗), the K is the genitive marker, and the e4 is the ergative marker.
- 7 (cn e2 a ni)
- 8 (cn mu na du3)

## Sentence structure

The text starts with the benefactive, that ends in R, not expressed.

The plural of nouns that refer to human beings is formed by a suffixed ENE. The plural of things, plants and animals is usually unmarked. Reduplication -- such as KUR.KUR (𒆳𒆳) -- conveys the idea of totality: "\*\*\*all the lands\*\*."

Then comes the agent, with the E prefix combined with the genitive ending into KE4 (𒂗𒅗).

The next in the line is the object that was built, to wit, his temple 𒂗𒅗𒂗 (cn e2 a ni).

## Annotations and Scholia

(cn an lugal digir re ne)

;; *For An, the king of the gods, ,*

In the above expression, the suffix ENE (𒂗) forms the plural of words that denote human beings and gods. The 'RE' (𒊕) is a reduplication of the final consonant of the previous word, *digir* (𒊕).

The genitive after a consonant is marked by A(K), where K is omissible. Therefore, the genitive is expressed by RA, where the R is contamination from the previous consonant.

三 白 米 白 米 米

The ENE marks the plural. The R in RENE is contamination from the previous consonant.

# Chapter 8: Relative Clause

## Typesetting

(cn ur an nammu)

(cn lugal urim ma)

(cn lugal ki-en-gi ki uri)

(cn lu2 e2 en-lil2 la2)

(cn in du3 a)

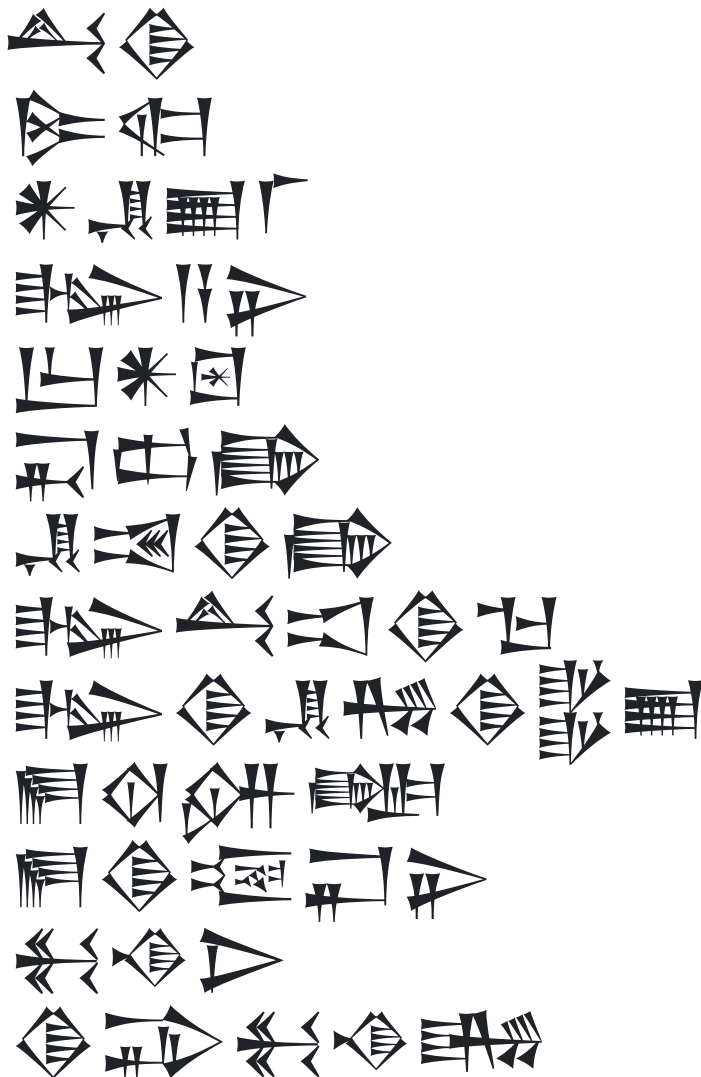

## Relative Clause

In a Sumerian relative clause, there are two elements. The first element is the head noun, LU2 () , the person who built the temple. The second element is a verbal phrase, which is transformed into an adjective by the suffix A. There is no need for a relative pronoun, such as *who* or *that*. The verbal phrase follows the noun directly. Pay attention to an important point: the relative clause ends in the adjective-forming A-morpheme. After all, relative clauses are adjectives.

# Translation

Ur-Nammu, the king of Ur, the king of Sumer and Akkad, the man who built the temple of Enlis.

# Chapter 9: Beloved Temple

## Typesetting

(cn en unug ki ga)

(cn lugal ki-en-gi ki uri ke4)

(cn etemenniguru)

(cn e2 ki aga2 ga2 ni)

KI AGA2 (𒀭𒀭𒀭) means "to love". Therefore, the A-formed adjective beloved is [KI.AGA2].{A}, or, [KI.AGA2].{GA2} (𒀭𒀭𒀭𒀭). NI (𒀭) is abbreviation of ANI, and means his.

(cn mu na du3)

(cn ki be2 mu na gi4)

The expression means to restore something so that it regains its former significance. In German: ***etwas restaurieren, wieder herrichten, so dass es seine alte Funktion/Bedeutung wieder erlangt.***

## Translation

For his lord Nanna, the eldest son of Enlil, Ur-Nammu -- the mighty man, the lord of Uruk, the king of Ur, the king of Sumer and Akkad -- built Etemenniguru, his beloved temple. He restored it to its former glory.

We have here an adjective form of built. Temporal clauses are consists of the head noun UD (𒂗𒀭, day) followed by a verbal phrase adjectivized in A (𒂗𒀭).

***;; whoever erases this inscription,***

The first element in the Sumerian verbal chain is the Modal Prefix (MP), which is unmarked for the indicative. Here, HA (𒀭) expresses the desiderative MP, which expresses wishes for the third person to fulfill.

There are two kinds of verbal roots in Sumerian. The Akkadians called them hamtu and marû. The marû is equivalent of our imperfect. In the relative phrase of the inscription, you can see an example of the marû root. It has the following components:

1. SHU -- part of the compound verb SHU...UR3 (𒍪...𒌆)
2. BI2 (𒁩) -- Conjugation Prefix (CP)
3. IB2 (𒁹) -- Personal affix cross-referencing the inscription
4. UR3 (𒌆) -- second part of the verb SHU...UR3 (𒍪...𒌆)
5. A (𒀭) -- formative element of adjective from verb

The last verb of the inscription (line 5) has the following components:

1. NAM (𒂗) -- cross-reference to a historic patient
2. HA (𒄩) -- Modal Prefix (MP)
3. BA (𒁩) -- Conjugation Prefix (CP)
4. DA (𒀭) -- Dimensional Prefix (DP) for the comitative
5. KU5 (𒀭) -- verbal element of NAM...KU5 (𒂗...𒀭)
6. E (𒂗) -- marû suffix

Note that the verb of the relative clause does not show the marû suffix, because it is omissible, like many other Sumerian markers.

## Translation

For his Lord Gilgamesh of Endimgig, the mighty man Ur-Nammu, the king of Ur, the king of Sumer and Akkad, when he built the temple of Nanna, dedicated this vase for the sake of his life. May Gilgamesh curse the man who erases this inscription.
